ABOUT US

IEM Health Sciences, is a pivotal component of the House Of Bhandari, it is our unwavering commitment to healthcare and life sciences through groundbreaking innovation that brought QRST to life.

In strategic collaboration with Axios Design and Technology Ltd, United Kingdom, we have **engineered a revolutionary technology employing quantum field bio-resonance stimulation for cell regeneration.** This innovative approach is intricately designed to address musculoskeletal disorders, enhancing mobility in conditions such as osteoarthritis, ligament injuries, spinal conditions and many more through **an energy introduction process that activates regeneration at the proton level.**

An integral part of QRST is its dedication to advancing healthcare and making this cutting-edge technology **accessible and affordable**, ushering in a new era of possibilities in the realm of medical treatments.

Our technology is designed to work at the **cellular level**, restoring vitality by promoting the body's inherent healing mechanisms.

Rooted in scientific research and developed in partnership with global experts, QRST's approach offers a **safe and non-invasive** solution.

By integrating advanced quantum bio-resonance stimulation, we empower patients to experience recovery that is **sustainable and transformative.**

We are redefining the future of regenerative medicine through innovation, **precision, and personalised treatment plans.**

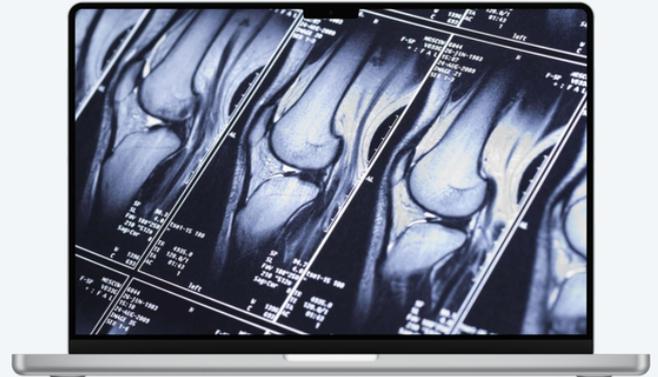

HOW IT WORKS

PART A: PREPARATION

A.1 EVALUATION

Each QRST treatment begins with a comprehensive evaluation of the patient's MRI / X-Ray scan by a qualified medical professional. Based on the imaging and diagnosis, a **personalized treatment protocol** is designed. This determines the **specific energy frequency, intensity, and duration** required to achieve optimal therapeutic outcomes.

ENERGY EMITORS

A.2 TREATMENT PLAN

The treatment typically spans **5 to 9 consecutive days**, depending on the nature and severity of the condition. Each session lasts for approximately **one hour**, during which the **targeted area**: such as the knee, spine, or shoulder, is **precisely aligned with the energy emitting component of the QRST device**.

HOW IT WORKS

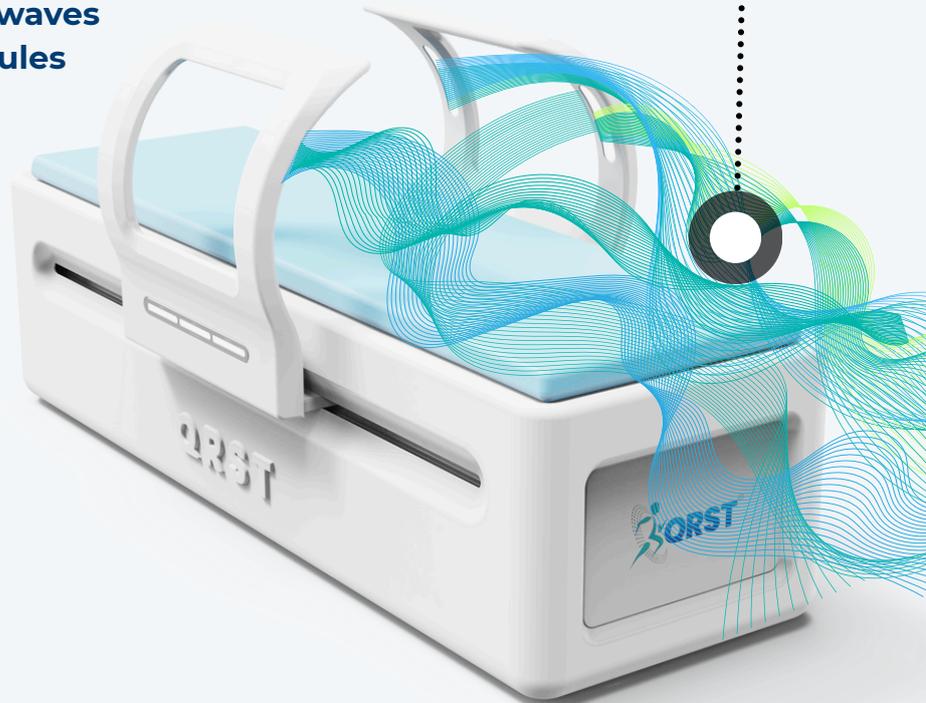

PART B: TREATMENT

B.1 ENERGY INTRODUCTION

Once activated, the **device emits controlled electromagnetic waves**, which **penetrate deep into the tissues** without any invasive procedure or discomfort. These magnetic **waves interact with the water molecules within the cells**, producing subtle vibrational and rotational energy transfer at a molecular level.

WAVES INTERACT WITH THE WATER MOLECULES WITHIN THE CELLS

B.2 ENERGY TRANSFER

This initiates a **cascade of biophysical reactions**, a continuous or “domino” effect, **stimulating the mitochondrial activity of the cells** and **restoring their natural energy balance**. As energy transfer stabilizes, **damaged and degenerated cells regain functionality**, shifting from a **degenerative to a regenerative state**.

HOW IT WORKS

PART C: RECOVERY

C.1 REGENERATION

The energy transferred **reactivates** the body's own repair and **tissue regeneration mechanisms**, promoting synthesis, **improved microcirculation**, and **cellular oxygenation**.

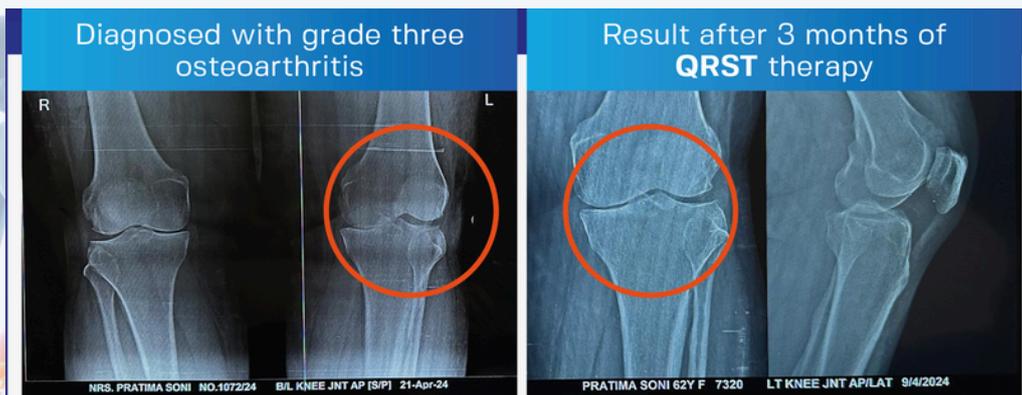

Over the course of therapy, patients experience **reduction in inflammation**, accelerated **healing of ligaments, cartilage, and bone tissues**, and a marked improvement in **pain relief** and mobility.

C.2 SUSTAINED HEALING

The regenerative response initiated during therapy **continues for 9 to 12 months post-treatment**, as the activated cells sustain ongoing repair processes.

QRST helps your body kickstart it's regenerative momentum and **enhances long term recovery and performance**.

KEY FEATURES OF QRST TECHNOLOGY

NON-INVASIVE

No surgery or invasive procedures required.

PAIN RELIEF

Provides rapid and effective reduction of discomfort.

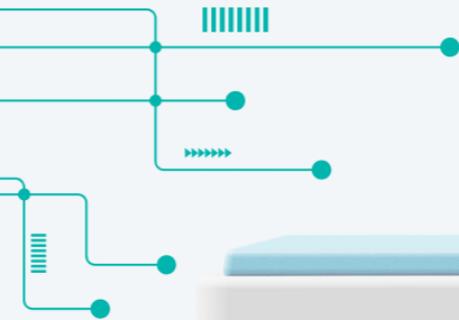

CELLULAR REGENERATION

Treats the body at a molecular level through cellular regeneration.

NO SIDE EFFECTS

Safe and free from side effects.
